

## Drum mounting instruction

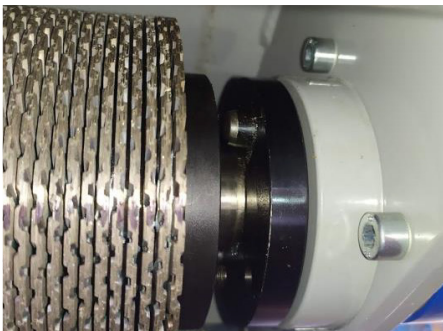

**1.** Unscrew and remove the 4 conical nuts on the side cover.

**2.** Remove the side cover by tightening the 2 butterfly screws (108029) that come with the machine.

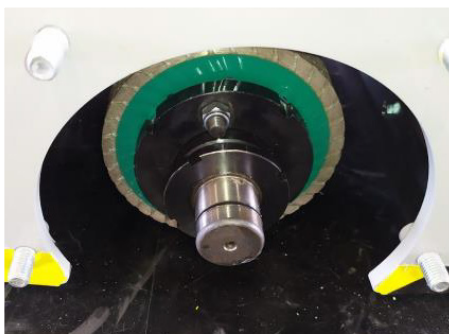

**3.** Rotate the shaft so that the two pins are in a horizontal position (to position the drum more easily)

**4.** Slide the drum on the shaft so that the two pins on the machine flange are against the two holes on the drum.

**5.** Check that the drum is properly engaged with the shaft

**6.** Tighten the shaft nut using the two wrenches included in the machine kit.

**7.** Install the side cover with the 4 conical nuts with the cone of the nuts facing the cover.
