## DTF 25 Drum mounting instruction

1. Unscrew and remove the 4 conical nuts on the side cover.

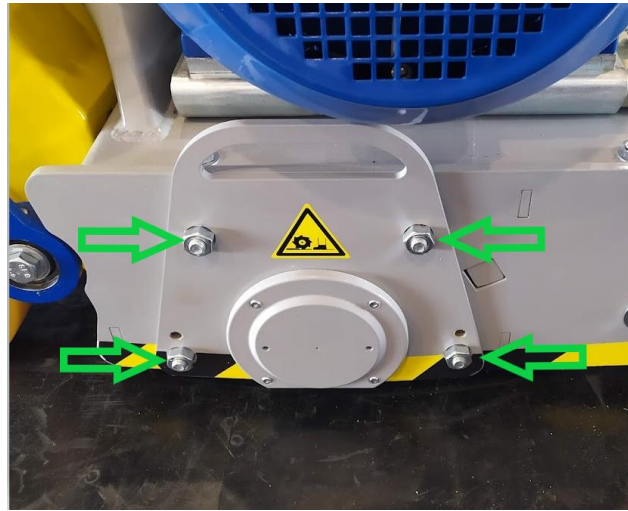

Figure 1

2. Remove the side cover by tightening the 2 butterfly screws (108029) that come with the machine.

3. Rotate the shaft so that the two pins are in a horizontal position (to position the drum more easily)

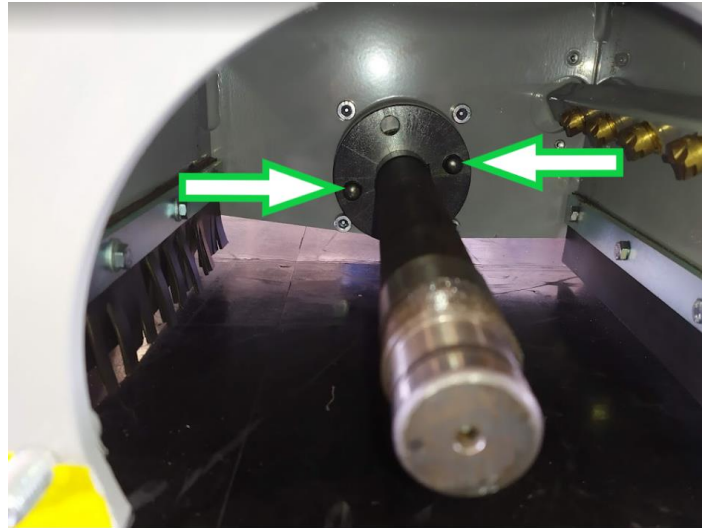

Figure 3

4. Slide the drum on the shaft so that the two pins on the machine flange are against the two holes on the drum.

5. Check that the drum is properly engaged with the shaft

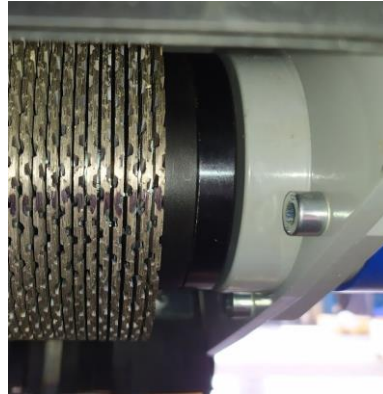

Figure 5

6. Tighten the shaft nut using the two wrenches included in the machine kit.

Figure 6

7. Install the side cover with the 4 conical nuts with the cone of the nuts facing the cover.
